Wireless Charging Protection System

Assembly instructions WCPS Raised floor

Assembly

1

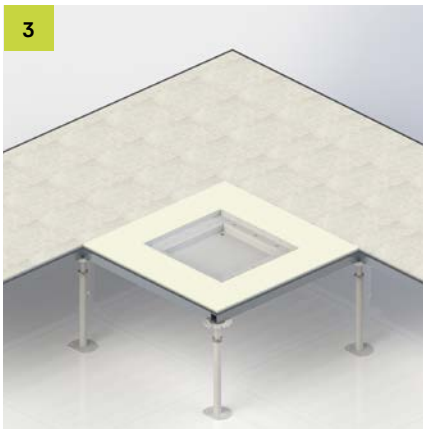

Removing the base plate at the desired loading point in the cleanroom.

2

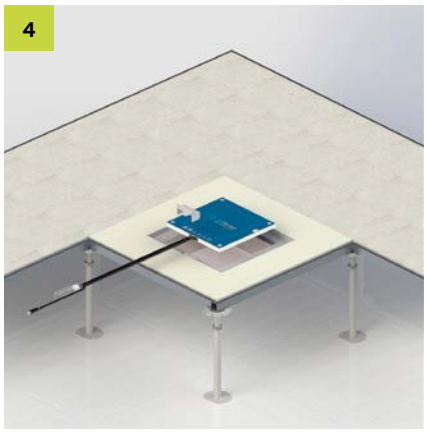

Installation of the WCPS raised floor onto the existing supporting structure.

3

If necessary, bolt the WCPS raised floor to the supporting structure.

4

Inserting the etaLink3000 charging pad.* The cable must be carefully fed through the opening provided for this purpose in the charging enclosure and to the wallbox*.

5

The charging pad must lie flat in the cassette unit and must not wobble.

6

Fit the PCX cover and seal the edges with a suitable sealant.

7

Depending on the internal cleanroom regulations, the information sticker should be affixed to the cover.
The maximum load capacity of the WCPS raised floor is specified as 5 kN.

* Wiferion products are not included in the scope of delivery. The charging electronics must be commissioned by a qualified technician.

Safety instructions

We recommend that the WCPS product be installed only by integrators certified by PohlCon or under the supervision of a Pohlcon site manager. Improper and unprofessional installation and resulting consequential damage will lead to the exclusion of warranty claims.

We recommend the use of suitable protective gloves.

Observe safety instructions

Read mounting instruction completely

Document the installation

The sticker instructions on the charging pad must be observed

1. No heavy load
2. No access for persons with pacemakers or implanted defibrillators
3. No access for persons with implants made of metal
4. No reaching in
5. No entry
6. Warning against non-ionizing radiation
7. Warning against hot surface
8. Observe important information in the Mounting instruction
9. Warning of electrical voltage
10. General warning
